Flow encoding - editorial representation of visible marks

```
problem -> [uncertain U15] / solutions -> But what / we did
```

Editorial explanation

EDITORIAL APPENDIX | Not original note content

Conventions

- Source pages are kept in their original order. Within each page, labels follow approximate visual reading order; they do not imply a new sequence of actions.

- A slash in a label records a handwritten line break. Bracketed text describes uncertainty or a visible graphic. IDs P1-01 etc. and U01 etc. are editorial identifiers.

- `->` records a visible arrowhead. `--[branch]--` records a connecting line without asserting direction. Nearby labels without arrows remain adjacent text, not invented branches.

- Words such as "freedome", "llm", "mcp", and "SS" are retained without expansion. Tentative readings in the register are possibilities, not confirmed transcriptions.

Connections and spatial qualifications

- Two long blue connectors run off the bottom of source page 1 and enter at the top of source page 2. Their positions suggest "demand handle" connects to U07, and "cognitive load (U01)" connects to "watcher". Cross-page matching is uncertain; treat both as provisional links, not confirmed edges.

- The arrow after "solution" points toward these long blue lines, without a clearly drawn junction identifying a particular destination.

- "text base" has a bent line toward "why"; "why" branches to "freedome", "llm / consumption", and "audit". A separate long dark line descends from the text-base/why area to "problem (friction when typing)". Its exact starting junction is ambiguous.

- Below "solve", a vertical branch carries "report", "template", and "voice". The green line to "template" crosses this blue branch; no junction dot is visible. The other green arrow points down/left near U03, but its exact destination is unclear.

- At the top of source page 2, both red arrows point upward beyond the visible page. Their destinations are not visible; connecting them to source page 1's "audit" or "report" would be an inference.

- "watcher", U06 + "page", "plan compare", and "drag and drop" are stacked. Likewise U07 / "hire vehicle" and "Admin" / U08 are stacked. The handwriting does not show separate arrows between these stacked labels.

- The red arrow beside "rest U09" points downward toward the presentation note. The boxed U11 phrase points right to "mcp". No visible connector joins the presentation line to the box.

- Source page 3 contains two clear downward arrows: "problem" to "U15 / solutions", then to "But what / we did". The bullet lines above and below are separate notes.

Uncertainty register

EDITORIAL APPENDIX | Tentative readings are not confirmed wording

Each U marker identifies handwriting that could not be read confidently. Possible readings below are supplied only to aid checking against the original scan.

U01 | Source page 1: Parenthesis after "cognitive load"; resembles "dispature" or "dispat..."; exact word unresolved.

U02 | Source page 1: Green word above "easy"; possible reading "driver"; uncertain.

U03 | Source page 1: Short green label left of the long connectors; resembles "jo"; unresolved.

U04 | Source page 1: Bottom red word after "issue vs"; appears to be "report", but is clipped by the page edge.

U05 | Source page 2: After "for live"; possible reading "dicision" (perhaps intended as "decision"); unresolved spelling.

U06 | Source page 2: Before "page"; possible reading "focs" or "focus"; uncertain.

U07 | Source page 2: Label at the long blue arrow; resembles "sheeduler"; possible intended word "scheduler".

U08 | Source page 2: Below "Admin"; possible reading "configurations"; final letters unclear.

U09 | Source page 2: After "rest"; possible reading "from"; uncertain.

U10 | Source page 2: Before "presentation"; name/word resembles "aginglage" or "a ginglage"; unresolved.

U11 | Source page 2: Boxed phrase; resembles "fure works"; possible intended phrase "future works".

U12 | Source page 3: Between "same" and "terms"; possible reading "log" or "leg"; uncertain.

U13 | Source page 3: After "terms"; resembles "everyware"; possible intended word "everywhere".

U14 | Source page 3: After "chess"; resembles "strater..."; possible intended word "strategy".

U15 | Source page 3: Word above "solutions"; resembles "obviouse"; exact spelling uncertain.

U16 | Source page 3: After "number"; possible reading "use"; uncertain.
